The XL MARBLE represents a whole world of sensations and styles. A symphony of finishes, shapes, sizes and designs are all at the forefront of innovation and development, demonstrating the total versatility that ceramics can offer. For lovers of contemporary design, a new conception of cement in large dimensions is born which stands out for its fresh and dynamic personality achieving magisterial ambiances full of sobriety and character. On the other hand, inspired by the classic and imperishable beauty of small format, a selection of timeless and elegant designs are created with imperfections and patterns boasting a greater degree of prominence and sophistication.

Eco-Sustainable
